Dawn Canary

Lattice Repia

Dawn Mauve

Melaleuca Copper

Dawn Sage

Pearlized Charcoal

A wide selection of colours are available

Features

When looking for a window covering that offers a great choice in fabrics along with ease of operation, it is hard to go past the Vertical blind.

The Vertical blind is one of the few window products that allows you to control both the light required into the room, while at the same time catering for your privacy needs.

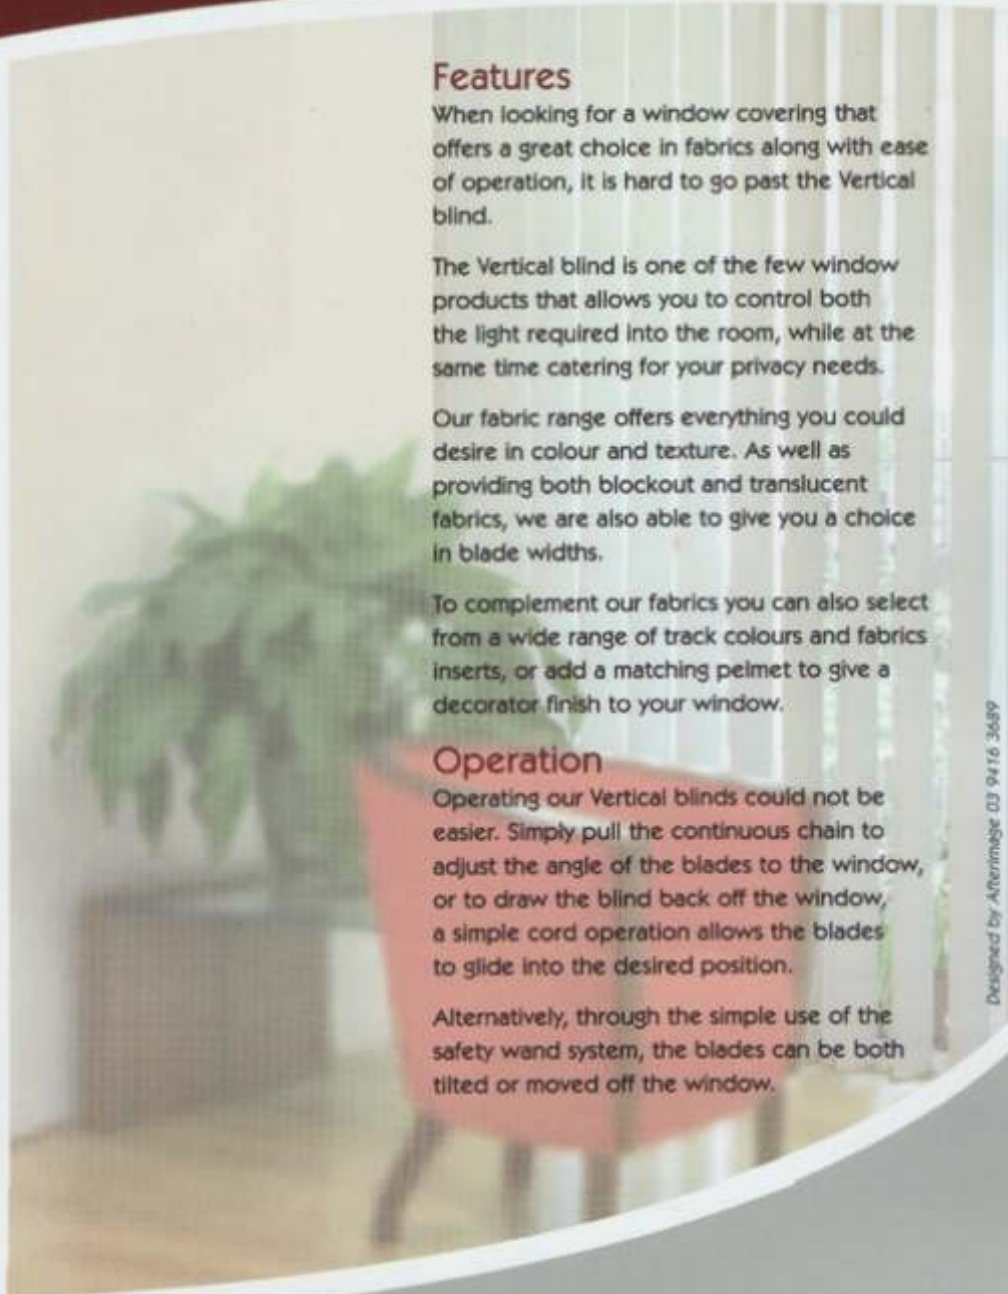

Our fabric range offers everything you could desire in colour and texture. As well as providing both blackout and translucent fabrics, we are also able to give you a choice in blade widths.

To complement our fabrics you can also select from a wide range of track colours and fabrics inserts, or add a matching pelmet to give a decorator finish to your window.

Operation

Operating our Vertical blinds could not be easier. Simply pull the continuous chain to adjust the angle of the blades to the window, or to draw the blind back off the window, a simple cord operation allows the blades to glide into the desired position.

Alternatively, through the simple use of the safety wand system, the blades can be both tilted or moved off the window.
